

Frequently asked questions ...

Will I need a skin test?

Radiesse™ dermal filler has a biocompatible formulation, so **no allergy testing** is needed before treatment.

Are there any side effects?

You may experience some common injection related reactions, like; swelling, pain, itching, discoloration and tenderness at the injection site, usually **residing after a few hours or days**.

What if I'm taking medication?

If you are taking medication, even if they are non-prescription, please **inform your physician**. It may influence your treatment.

Does it hurt?

Patients may react differently, so please **check with your physician about pain management** during the procedure.

Can Radiesse™ dermal filler be injected over other implants?

If you have previously been injected with other fillers or if you have had permanent implants inserted, please **notify and consult your physician**.

Is Radiesse™ dermal filler permanent?

No, the gel carrier dissolves within a few months and the structural microspheres are broken down over the following months through the body's natural processes.

Will Radiesse™ dermal filler become hard or noticeable to touch?

No, Radiesse™ dermal filler stays **soft and pliable** and will take on the characteristics of the body's own tissue.

How long will Radiesse™ dermal filler last?

A Radiesse™ dermal filler correction should **last more than one year, sometimes up to two years**. Individual results may vary, and can be affected by age, skin type, lifestyle and muscle activity. Longevity can also differ per treatment area.

Is Radiesse™ dermal filler approved by Health Authorities?

Yes, Radiesse™ dermal filler is **fully approved in Europe** (with CE-certification) **and in the US** (FDA clearance).

How quickly can I return to my normal activities?

Most patients **return to work immediately after treatment**. Around 24 hours after injection, most swelling or redness will have subsided.

IF YOU HAVE ADDITIONAL QUESTIONS, CONSULT YOUR PHYSICIAN.

**YOU TOO CAN LOOK YOUNGER
WHILE KEEPING YOUR
NATURAL APPEARANCE!**

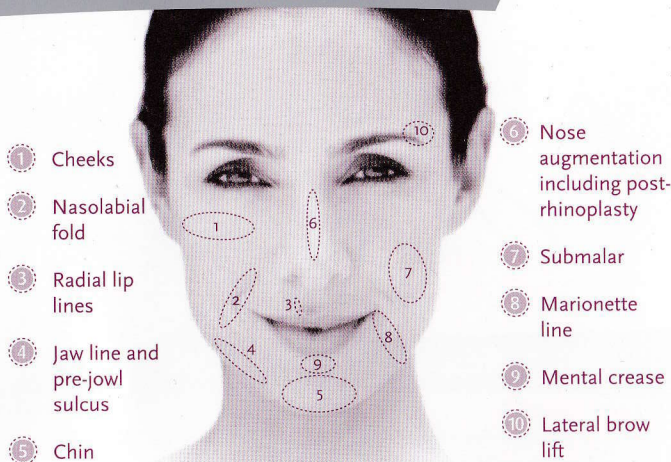

What can Radiesse™ dermal filler do for you?

If you want to have a younger, more rested appearance, enhance your existing features and feel more confident without undergoing invasive surgery: **Radiesse™ dermal filler is your answer!**

**Radiesse™ dermal filler,
the innovative injectable:**

- Restores a youthful look in less than an hour
- Gives **immediate results**, requiring little or no recovery time
- Feels **soft and looks natural** because it stimulates the growth of the body's own collagen
- Lasts **up to 18 months**, longer than most leading dermal fillers
- Is **highly effective and very safe**
- Has received **high satisfaction scores** from current users

Multiple treatments areas available :

Radiesse™ dermal filler can be used for **multiple treatment areas**. Please consult your physician to discuss your individual treatment plan.

Real patients, real results:

Facial rejuvenation, for a natural youthful look:

Nasolabial folds

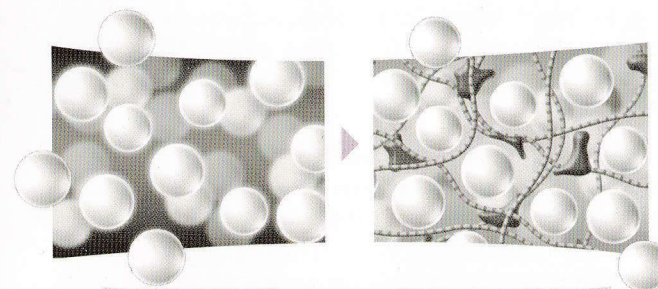

Hand rejuvenation, for a natural youthful touch:

Hand rejuvenation

What is Radiesse™ dermal filler and how does it work?

- Radiesse™ dermal filler is a unique dermal filler made from synthetic calcium hydroxylapatite (CaHA) microspheres suspended in a water based gel carrier. It is **100% biocompatible**, therefore **no allergy testing** is needed before treatment. CaHA and its components calcium and phosphate occur naturally in human tissue.
- Radiesse™ dermal filler is **injected below the skin's surface through a fine needle**. A local anesthetic can be used during treatment, which takes less than an hour.
- Once in position, the CaHA particles form a "scaffold" to **support and stimulate the growth of the body's own collagen**.

Gel & particles
Immediate correction at the moment of injection

Collagen & particles
Longer-lasting correction due to the production of your own collagen

- Because Radiesse™ dermal filler is **biodegradable**, it is gradually broken down over time and is safely and naturally absorbed by the body. **The results are longer-lasting, up to 18 months or longer**, but not permanent.
- You will usually achieve your desired results after **just one visit**. To ensure your Radiesse™ dermal filler treatment provides the long term enhancement you want, a **follow-up visit** is usually scheduled **2 to 3 months after the initial treatment**, during which the need for a refinement is evaluated.
