ONE LIFE - ONE SKIN

YOUR SKIN

YOUR GREATEST BEAUTY ASSET

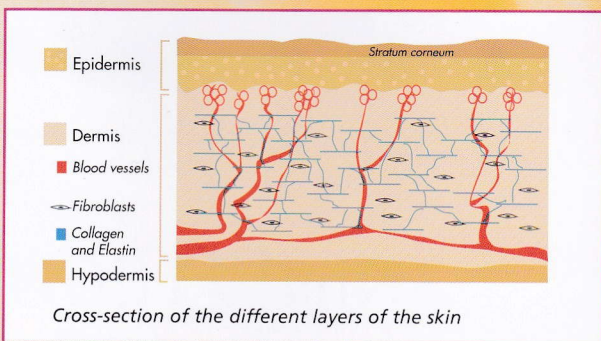

The skin is a remarkable living, breathing organ that protects us from external aggressions throughout our lives. It is without doubt our greatest beauty asset.

The skin is our body's envelope and seems to have an unlimited capacity to regenerate itself as if by magic, without us even having to pay it any particular attention.

And yet, like any living organ, the skin should be considered an asset that needs protecting and maintaining on a daily basis. In fact, with time, the skin gradually loses its powers of regeneration as well as its elasticity and suppleness.

To prevent cutaneous problems and to put an effective brake on the ageing process, your skin therefore needs daily care: purifying, moisturizing, nourishing and protecting.

30 years of experience have helped us develop a whole range of effective and reliable daily care products.

*Under constant attack,
the skin regenerates
itself*

*The skin consists of three superimposed layers:
the epidermis, the dermis and the hypodermis.*

The epidermis

This is the outer layer of skin. The topmost part is made up of dead cells that make the skin impermeable. It is the epidermis that lends skin its colour. Deep within this layer the cells multiply and replace cells that have been shed.

The dermis

The (young) dermis is a complex structure, made up of cells that bathe in an environment that is hydrated, swollen with collagen, hyaluronic acid and elastin. The youthful condition of the dermis gives the skin its overall youthfulness.

The hypodermis

This is the deepest layer of the skin. The tissues of the hypodermis are rich in fats. Its main role is to cushion the skin from the stresses it undergoes and to provide the dermis and epidermis with a vital store of nutrients to keep the skin healthy.

*After the age of 40,
the skin needs a little
more help*

After 40, skin cells regenerate more slowly and the signs of ageing gradually begin to show.

These can be attenuated by regular use of care creams specially designed to help delay the effects of time or by medical procedures or treatments (chemical peels, for example).

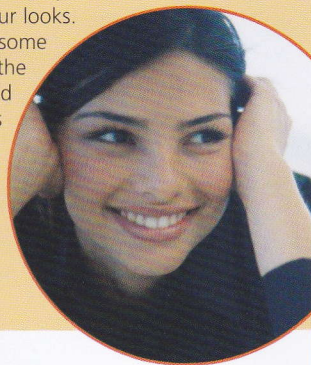

YOUR SKIN IS A LIVING ORGAN,
LEARN HOW TO MAINTAIN IT.

NO It hates...

- **Smoking**, because it dulls the complexion and dries the skin out even more, thus speeding up the ageing process. Giving up smoking gives your skin back its radiance and restores you to a good state of health.
- **Stress**. Professional life, time management, anxiety... there is an ever-increasing number of stress factors in modern life. Stress makes the skin more sensitive, makes it lose its vitality and changes its structure. If it is dry, it becomes even drier. If it is mixed, it becomes oilier.
- **Hyperthermia** caused by sun exposure. Something we are often unaware of: a rise in temperature of a few degrees upsets vital cell functions and contributes to the destruction of skin cells. Using a sunblock with HSP inducers and UVA/UVB filters (Melablock-HSP⁵⁰) protects your skin from heat shock.
- **Alcohol and stimulants** like tea or coffee. Drink them in moderation.
- **Abrasive soaps and shower gels** that damage the structure of the skin and make it more sensitive.
- **Free radicals** that destroy skin cells. Free radicals are produced naturally by our bodies, but also by external factors: UV rays, chemicals, medicines, smoke and air pollution... Vitamin E, vitamin C and lipoic acid help fight against free radicals.
- **Excessive sunbathing**. UVA and UVB rays are the cause of premature skin ageing. It is vital to protect yourself with sunblock (Melablock-HSP or Spray 25. It does not stop you tanning, but allows you to tan gradually, preventing pigmentation marks and premature skin ageing.
- **An unhealthy lifestyle**. An enormous percentage of visible facial ageing is caused by external factors (sun, smoking, pollution, poor diet...). Biological ageing remains only in a very little form. Start making the right choices and adopt a healthy lifestyle from today!

YES It loves...

- **You to be well rested**. Sleep is vital for your beauty. If needs be, get an early night once a week to catch up on your sleep. To help you get to sleep more easily, make sure you don't have a big dinner and drink a relaxing herbal tea before going to bed.
- **Careful cleansing**. Washing your skin in the morning and evening with Skin Tech's cleanser is a good cleansing routine that restores your skin's balance. It helps eliminate the small impurities that build up throughout the day and during the night. Whatever your skin type, you should always use a mild cleanser.
- **Moisturizing**. Beautiful skin is well hydrated and protected against the sun, the cold and... the effects of time. Skin Tech has just what your skin needs: Vit. E Anti-oxidant, Re-Nutriv ACE Lipoic Complex and Melablock-HSP⁵⁰.
- **A balanced diet**. We are what we eat and if our diet is lacking in something, not only is it written on our faces, but our health suffers too. A balanced diet includes 4 major food groups: fruit and vegetables; fish, meat and eggs; dairy products; starches and bread.
- **Water**. You should drink at least 1.5 litres of water a day to help your body eliminate toxins and to ensure a healthy complexion.
- **Regular beauty care**. The secret to healthy, glowing skin is the time you spend caring for it. Put aside 10 minutes a day to care for your skin.
- **Joie de vivre**, does wonders for your looks. Learn to put some perspective on the little ups and downs of life. It's essential for your wellbeing and for the good of those around you.

SKIN  TECH

30 YEARS

CARING FOR ALL SKIN TYPES

Our experts have been working for nearly 30 years, gaining clinical experience that, together with constant exchanges at international conferences, has allowed us to develop a range of professional products for use in cosmetic medicine, surgery and dermatology. This range of products is used throughout the world and has proved effective and reliable, no matter what the skin type.

We are constantly enriching our range of products, perfecting the daily care creams that have been specially formulated for the most sensitive skins (between and after peels) and that confront the problems of ageing, hydration, protection, etc.

At Skin Tech we are constantly trying to improve our formulas and are firmly positioned in the world of chemical peels and high-performance daily skin care.

Range of Skin Tech daily care

Less advertising and more active ingredients

This is without doubt what Skin Tech's product range is all about. From Moscow to Sao Paulo, from Kuala Lumpur to Dubai or Paris, we have an ever-growing number of clients who are enjoying the benefits of Skin Tech's products. Better than conventional advertising, it is the people who use our products daily that are the best ambassadors for Skin Tech!

Recognized and appreciated by the medical profession

Because results and safety are essential for doctors, there are many who put their faith in Skin Tech today.

With a product range that is reliable, simple and effective on all skin types, Skin Tech has made a name for itself in over fifty countries.

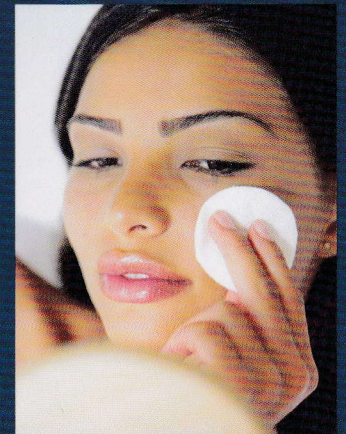

Recognized and appreciated by the medical profession, Skin Tech can boast of being one of the rare brands of dermatological and cosmeceutical products to enjoy such international "approval".

... and now also in the field of daily care

Same recipe. Same success. By applying its motto of "Advanced Skin Technologies" to the world of daily care products, Skin Tech has proved that it is possible to provide highly effective products for the general public and not just for an elite with incredibly deep pockets.

Offering exceptional value for money, our products are now enjoyed daily by women and men in five continents.

DAILY CARE PRODUCTS

Skin Tech's daily care products are suitable for all skin types, even the most sensitive skins.

Young, problem skin, pigmentation, skin ageing, moisturizing, cleansing, sun protection... our product range answers all your skincare needs.

SKIN TECH

DRY OR SENSITIVE SKINS

Vit. E Anti-oxydant

50 ml Tube

This cream is for the most sensitive skins. It is very fluid and penetrates easily. Thanks to its long-lasting moisturizing action, it has a genuine anti-wrinkle effect.

- Protects the skin against external aggressions.
- Contains vitamin E to help combat free radicals.
- Its intense action increases skin regeneration after laser treatment, peels or dermabrasion.

Apply in the morning as a base for make-up or as a treatment for skin regeneration (up to 6 times a day).

WRINKLES

DHEA-Phyto

50 ml Tube

The skin loses its firmness with age and starts to sag. DHEA-Phyto improves your skin's elasticity and gives it a more youthful appearance.

- Prevents skin ageing of the face, neck and décolletage.
- Protects the skin against free radicals and external aggressions.
- Essential for the over-40s.

Apply in the morning and evening after washing.
It is an excellent base for make-up.

Re-Nutriv ACE Lipoic Complex

50 ml Tube

Its formula enriched in vitamins A, C and E tightens the tissues and strengthens the skin. The skin becomes firmer and more elastic. A real breath of fresh air for your face.

- Activates the synthesis of collagen fibres.
- Hydrating and antioxidant lipoic acid protects your skin against free radicals.

Apply in the evening after washing.

ACNE Purifying Cream and Purigel

50 ml Tubes

Clean the skin out of impurities caused by the hormonal imbalances of adolescence or maturity.

Purigel is a long-term daily treatment.

- Reduce the signs of local oedema with their antiseptic and anti-inflammatory action.
- Glycolic acid prevents skin problems recurring.
- Fight against free radicals and promote skin renewal.

Apply in the morning and evening.

BLOTCHY COMPLEXION AND MARKS

Blending Bleaching Cream

Tube de 50 ml

The skin becomes lighter and its texture more refined: your skin is more radiant. It looks healthier.

- Reduces or even gets rid of hyper-pigmentation.
- Its complex formula, rich in active ingredients, does not contain hydroquinone and does not irritate the skin.
- Contains vitamin E to provide an antioxidant cream.

Apply on the whole face in the morning and only on the marks in the evening. Use in combination with sun protection, Melablock-HSP®50.

TIGHTENING EFFECT

Actilift

50 ml Tube

Clinical results prove it: Actilift with DMAE helps your skin gain in firmness and elasticity. Actilift helps restore the oval shape of your face.

- Tightening effect that works by stimulating the contraction of muscle fibres in the dermis. Compatible with botulinum toxin.
- Improves skin hydration.
- Scavenges free radicals and protects the skin from external aggressions.

Apply in the morning and/or evening after washing and before any other cream.

Actilift Body

Body lotion

Your whole body can now benefit from the action of DMAE. The whole skin can now be treated for ageing.

- Tightening effect that works by stimulating the contraction of muscle fibres in the dermis.
- Improves skin hydration.
- Scavenges free radicals and protects the skin from external aggressions.

Apply in the morning or evening after washing.

200 ml Tube

SUN PROTECTION

Melablock-HSP®50

Melablock-HSP® Base Color 50

Melablock-HSP® Spray 25

50 ml Tubes

50 ml Spray

Three sun protections that allow gradual tanning without the formation of pigmentation marks.

- Reflect UVA and UVB rays and absorb the rays that are not reflected.
- Protect the skin against heat shock (increases in temperature), the cause of cell death after exposure to the sun.
- Excellent anti free radicals.

Reapply every 2 hours.

CLEANSING FOAM

Cleanser

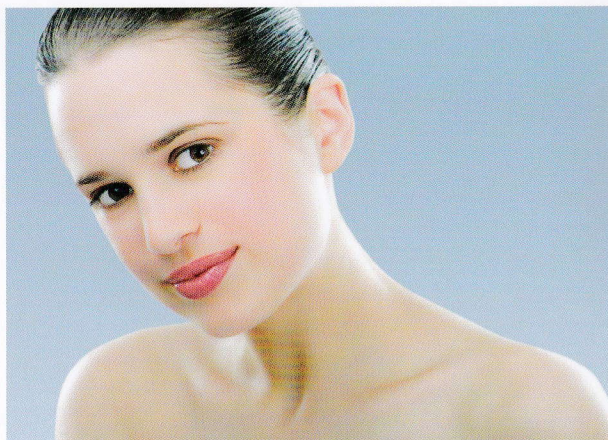

150 ml Bottle

A cleansing foam suitable for all skin types, even very sensitive skins.

- It is non-comedogenic and gently clears the skin of all impurities.
- Its light texture makes it pleasant to use.
- Well tolerated by delicate skins or before dermatological treatments.

Use in the morning and evening, gently rubbing the foam in with circular movements. Wipe off with a cotton pad or tissue.

From innovation to innovation, Skin Tech stands out as one of the inescapable reference of anti aging medical.

Two novelties are henceforth added to our range of daily care.

INNOVATIONS

SKIN  TECH
advanced skin technologies

ANTI-AGING SERUM

B-Phase Addiction®

14 ml Bottle

Double action anti-aging serum

B-Phase Addiction® is a hydrating serum containing a highly concentrated mixture of 3 oligopeptides (pentapeptide, hexapeptide and octapeptide).

- Makes the wrinkled skin relaxed.
- Stimulates skin cell regeneration.
- Helps to produce collagen and elastin fibres.
- Prevents and treats skin aging.

Apply B-Phase Addiction® once or twice a day on absolutely clean and dry skin in the areas chosen or the whole face, gently massaging to facilitate penetration.

B-Phase Addiction®, is indicated for all skin types. Its continued daily use helps maintain the skin looking young and cared for.

POST TREATMENT

IPLase Mask®

30 ml Tube

Excellent cream used as daily protection for skin subjected to all types of thermogenic treatment. (Laser, Intense Pulsed Light, UV Radiation, thermogenic radio frequencies, etc.).

- SOD and Ubiquinone: two antioxidants that are essential to prevent the damage caused by free radicals.
- HSP: Fights against the thermal damages, responsible for the cellular destruction and consequently the aging cutaneous.

Apply a thick layer immediately after having subject the skin to any source of heat energy.

It is recommended to continue applying IPLase Mask® twice a day during the entire time between treatment sessions with Laser, Intense Pulsed Light or another type of thermogenic energy. This is to increase resistance to heat stress.

It is recommended to protect the skin from the sun if the area to be treated is going to be exposed to the sun afterward, repeat application of Melablock-HSP®50 ou Melablock-HSP® Spray 25 every 2-3 hours during exposure to sun lasts.

PEELS

The purpose of a peel is to remedy skin ageing, pigmentation marks, acne scars, seborrhea, etc.

The skin's texture is refined and the complexion becomes clearer and brighter.

SKIN TECH
advanced skin technologies

There are three different types of peel, light, medium or deep, depending on the depth to which the skin is treated. All peels should be carried out in a surgery by an experienced doctor. A medical peel is not just an exfoliation treatment that can be done at home.

Skin Tech has developed a range of medical peels suitable for all skin types.

Easy Phytic Solution put the glow back in your face

This is a superficial peel with a gradual, accumulative effect. It is for patients who do not want their skin to flake, but who an effective acne or anti-ageing treatment. It is repeated once or twice a week for the duration of the treatment. Your social life is not affected.

Easy TCA look young again

This peel, recommended to treat age spots and acne, also puts the glow back in tired skin. It is painless and treatment consists of 4 sessions (one peel per week). It need not interrupt your working life at all and can be done during your lunch break. Easy TCA is also used to rejuvenate the hands and to treat scars and stretch marks. No anaesthetic is needed, as it is not a painful procedure. This is a lunchtime peel.

Unideep complete rejuvenation

Unideep regenerates the structure of the skin. The rejuvenating effect can take several years off. It activates collagen synthesis. This peel has a downtime of about 5 days.

Only Touch a deep local treatment

Recommended for very localized age spots on the hands, face and décolletage, in combination with Easy TCA.

Lip & Eyelid Formula complete rejuvenation for the eyes and lips or even the whole face

Designed to erase deep wrinkles and take off 10, 15 or 20 years! Downtime is around 8 days.

Depending on the condition of your skin and the results you are looking for, your doctor will help you choose the peel and daily care products you need. Only your doctor is qualified to do this.
